"We Put Quality Between You And The Elements"

Bahamas Aluminum Manufacturing's NEW STORM PLUS® LINE Impact Resistant Storm System

Security Impact Resistant Windows and Doors combine heavy-duty aluminum frames with impact-resistant laminated glass. This glass may crack on impact, but the interlayer keeps the glass intact, preventing destructive wind from entering your home.

Why Aluminum?

For over 100 years Aluminum Windows & Doors Have Been Tested and Proven To Last in the Harshesht Coastal Weather Elements! Aluminum will not Crack, Rot, Bow, Warp, Fade or Breakdown over time from the Heavy Rains or Blazing Sun.

Wood Windows cannot take the Rain! (Which means they may weaken & soon begin to rot!)

Vinyl Windows cannot take the Heat! (Which means they may weaken & soon begin to warp!)

If these materials cannot handle coastal weather, do you think that they can stand up to a hurricane?

You get more with ALUMINUM IMPACT Windows & Doors!

**Plus You Get: UV Protection,
Noise Reduction, and Intruder Deterrent**

STORM PLUS WINDOWS INCLUDE:

Materials: All frame and sash members shall be extruded 6063-T6 aluminum alloys.
Hardware: Sash operates on Spiral Balances.
Glazing: window shall be factory wet glazed with 5/16" laminated safety glass with an extruded glazing bead. (Available in Clear, Grey, and Solex Tint.)
Insect Screen: Screen shall fit flush in the frame. Screen frame shall be roll-formed aluminum box profile. Mesh fabric shall be 18 x 16 grey fiberglass. Spline is circular profiled vinyl.

STORM PLUS FRENCH DOORS INCLUDE:

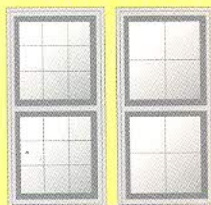

- Heavy guage extruded aluminum 6063T6 door and frame (.078" wall thickness)
- Double weatherstrip around perimeter with sealed top & bottom rails
- Full view of colonial muntins
- 7/16 laminated safety glass
- Forced-entry approved and burglar-resistant.
- Tie-rod, door leaf construction prevents door sagging
- Solid 1 3/4" x 4" tubular frame & door.
- The most solid door on the market.
